David Rohwer  
President

October 11, 2005

To Whom It May Concern;

Rockwell Engineering and Construction has been working for our fire department this summer, preparing the site and foundation for a new fire station. They have performed well, being able to offer valuable engineering concepts for our consideration and providing capable services to install features of the design as shown or with last minute changes at our direction. They have a network of experienced subcontractors who also performed well. Between themselves and the available subcontractors, they had the necessary resources to handle the scope of the work assigned to them.

To date they have performed over \$130,000 worth of work and we expect that the total services will be in the \$150,000 to \$175,000 range as the site work winds down for the season.

From our perspective, the scope and magnitude of our project was well within Rockwell's capacity and we would not hesitate to consider engaging them for a larger endeavor.

On behalf of the CGFR Station 3 Building Committee,

David Rohwer  
President, Board of Directors
